

Insulin Safety Syringes *Sterile*

Insulin Safety Syringes are designed specifically for the administration of insulin. These syringes are marked with precise units of measurement to ensure accurate insulin dosing. The fine gauge needle provides a smoother insertion for an improved comfortable injection experience.

Features & Benefits:

- Not made with natural rubber latex
- Sterile - individually packaged
- Easy to secure pull-and-twist safety mechanism
- Pre-attached ultra-sharp stainless steel needle
- Transparent barrel with large-font gradations allows for accurate measurement
- For use with U-100 insulin
- Low dead-space design
