

Antifungal Powder

(Miconazole Nitrate 2%)

ProCure Antifungal Powder with 2% Miconazole Nitrate is a clinically proven treatment for common superficial fungal infections, including athlete's foot, jock itch, and ringworm. The active ingredient, miconazole nitrate, works by inhibiting the growth and reproduction of dermatophytes, helping to effectively eliminate infection at the source.

This talc-free formulation delivers targeted symptom relief, helping to reduce itching, scaling, cracking, burning, redness, irritation, and chafing associated with these conditions. Designed for consistent, reliable performance in clinical settings, **ProCure Antifungal Powder** supports both treatment and patient comfort.

**Proven
Clinically
Effective**
