6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedure

Cover with inert, absorbent material and remove to the disposal container. Spill area may be slippery. Flush with plenty of water.

Environmental Protection

Avoid discharge into drains, water Sources or onto the ground.

Method and Material for containment and cleaning up

Absorb spill with vermiculite or other inert material, then place in a sealed container for chemical waste.

Large Spills: Flush with plenty of water.

Prevent entry into waterways, sewer, basements or confined areas. Dike for later disposal.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

7. HANDLING AND STORAGE

Precaution for safe handling

Use adequate ventilation. Avoid contact with eyes, skin and clothing.

When handling, use appropriate personal protective equipment.

Wash thoroughly after handling.

Releases to the environment should be avoided.

Review and implement appropriate technical and procedural waste water and waste disposal measures to prevent occupational exposure or environmental releases.

Potential points of process emissions of this material to the atmosphere should be controlled with dust collectors, HEPA filtration systems or other equivalent controls.

Control parameter

Occupational exposure limits Data not available

Biological limit values Not established in OSHA.

Exposure control

Appropriate engineering controls General ventilation normally adequate. An Exposure Control Approach (ECA) is established for operations involving this material based upon the OEL/Occupational Hazard Category and the outcome of a site- or operation-specific risk assessment.

Personal protective equipment:

Eye/ face protection Not normally needed. For prolonged or repeated skin contact use suitable protective gloves

Skin protection Not normally needed. For prolonged or repeated skin contact use suitable protective gloves

Respiratory protection No personal respiratory protective equipment normally required. Use a NIOSH/MSHA approved respirator if there is a risk of exposure to dust/fume at levels exceeding the exposure limits. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators.
