

## Waterproof Composite Island Dressing

### *Sterile with Non-Woven Adhesive Border*

**ProCure Waterproof Composite Island Dressing** with non-woven adhesive border is a sterile, high-quality, all-in-one wound care solution designed to protect wounds from external contaminants while promoting healing. Its waterproof outer layer effectively seals out moisture and bacteria. The central absorbent pad efficiently manages exudate, reducing the risk of maceration and infection. This sterile dressing is suitable for post-operative wounds, abrasions, and minor cuts, offering both protection and comfort.

### Features & Benefits:

- Waterproof and sterile for optimal wound protection
- Non-woven adhesive border for secure placement
- Breathable material for comfort and moisture management
- Provides a barrier against external contaminants
- Available in multiple sizes for various wound types

### ENHANCED PATIENT COMFORT

*Multi-layered composite dressings are designed to be medium absorbent, while still being gentle to the skin, minimizing pain during dressing changes.*

*Not made with natural rubber latex.*
