

Soft Silicone Bordered Gauze Adhesive Wound Dressing

ProCure Soft Silicone Bordered Gauze Wound Dressing combines the trusted protection and absorbency of traditional bordered gauze with the added benefit of a soft silicone adhesive layer. This advanced design allows the dressing to securely adhere to the surrounding skin without sticking to the wound bed, making removal less painful and reducing the risk of skin trauma or wound disruption. Ideal for sensitive or fragile skin, it offers a comfortable and effective solution for managing a variety of wounds while promoting a healthier healing environment.

ENHANCED PATIENT COMFORT

Soft silicone border gently adheres without sticking to the wound, reducing pain during removal. Breathable and absorbent to support a moist environment and enhance patient comfort at every stage of recovery.

Not made with natural rubber latex.

Features & Benefits:

- Ideal dressing for daily use
- Promotes comfort and safety for fragile skin
- Self-adherent silicone adhesive contact surface and border help to maintain a moist healing environment and prevent external contamination
- Not made with natural rubber latex
- Soft and flexible, low-profile border
- Easy removal
