

Safety PEN NEEDLES

ProCure Safety Pen Needles are ideal for patients managing diabetes as they are designed for safe and comfortable insulin delivery. Featuring an automatic protective shield, they help prevent accidental needlestick injuries while ensuring precise and painless injections. Compatible with most insulin pens, they offer a secure, user-friendly solution for daily diabetes care.

Also available in ProCure Dual Safety Pen Needle format for enhanced protection on both ends of the needle.

Features & Benefits:

- Compatible with most insulin pens for versatile use
- Automatic safety shield helps prevent needlestick injuries
- Ultra-fine, lubricated needle for smooth, comfortable injections
- Single-use design reduces risk of cross-contamination
- Easy, one-step injection process for user convenience
- Available in Dual Safety format for protection on both ends of the needle
- Ideal for home or clinical diabetes care settings
- Not made with natural rubber latex
