

Flexible Unna Boot Bandages with Zinc

ProCure Unna Boot Bandages are made of soft, non-raveling knitted gauze evenly impregnated with a non-hardening zinc oxide paste. This formulation helps reduce inflammation, soothe the skin, and support the natural healing process while maintaining a moist environment. Designed to provide gentle, consistent compression, these bandages promote venous return and are ideal for the ambulatory treatment of stasis leg ulcers, lymphatic edema, eczema of the leg.

The flexible, conforming design and unique easy-to-open seal pouch ensure convenience, comfort, and reliability for both clinical and home care use.

Formulated
with Zinc

Provides
Gentle
Compression
& Support
